Smile with confidence
Dental care Can help!

Beautiful teeth reflects healthy and glowing personality

Various dental problems that can affect your smile and confidence can be corrected with the following procedures

1. Discolored teeth (bleaching in office / take home)
2. Extremely discolored teeth where bleaching and polishing are ineffective (placement of porcelain or composite facings)
3. Excessive space between front teeth (closure of excessive space with bonding)
4. Excessive space between teeth throughout the whole mouth (orthodontics treatment by using braces)
5. Crowding or malposed teeth and improper facial profile (upper / lower jaw relationship) (orthodontics treatment by using braces)
6. Localized malposed teeth where time is limited by patients' schedule (bonding, recontour of teeth, crowns, bridges, extractions or implants)
7. Severe decay affecting the teeth esthetics (fillings, root canal treatment, , crowns, bridges, extractions or implants)
8. Missing teeth (crowns, bridges, removal partial/complete dentures and implants)
9. Dental enhancement

* placement of gemstone on tooth

* canine augmentation

* treatment of gummy smile
